Proposed Revision  Travel and Related Expenses -  
Use of Ships of This Country

25X1A

1. Reference is made to our discussion regarding memorandum of 26 May 1955, subject above. In accordance with that discussion, it is the view of this Division that the proposed revision should be modified by deleting ". . . that upon determination by the port commander concerned. . ." from the sixth and seventh lines of the proposed 4c(1), and adding "if" after "that" in the seventh line.

2. Also, we suggest that in lieu of the proposed section 5, that the present section 5 be continued in its present form, except that "travel" be eliminated from the first line. Provision for certification only by a person submitting a reimbursement voucher should be adequate in view of the fact that such claims will be received only in those cases wherein employees assume responsibility for the shipment of goods personally. In those cases where shipment is through Agency channels it can only be assumed that applicable laws have been observed.
